RE: Region5 Southern California 700 MHz Regional Planning Committee – Request for approval of frequency allocations changes - Docket 02-378

Marlene H. Dortch, Secretary
Federal Communications Commission
Office of the Secretary
445 12th Street, SW
Washington, DC 20554

Dear Secretary Dortch:

At the May 20, 2011 frequency coordination meeting of the Region 5 700 MHz regional planning the attached spreadsheet of changes to frequency allocations was voted on and approved by the members. Region 5 requests the FCC approval of these changes.

These changes are highlighted in Yellow in the spreadsheet. They include a changed channel allotment for the City of San Diego so the County of Riverside can expand to additional sites and to resolve interference concerns impacting the County of Orange and the City of San Diego at some sites. Additionally, new allocations are made to the Port of Los Angeles (Port of LA). These allocations are only for the vicinity of the Port of Los Angeles. Adjacent Region concurrence is also attached.

These changes also reflect the planning preference of the Committee to make allotments to specific agencies, not general allotments to geographical areas. This is due to the extreme needs for spectrum in the Southern California area.

Sincerely

A handwritten signature in cursive script, appearing to read "David Buchanan".

David Buchanan, Chair Region 5 700 MHz Regional Planning Committee
